Electric Distribution Services Program

Maintain a reliable electric distribution system

NMPP's Electric Distribution Services (EDS) program provides municipal utilities with the tools and expertise to maintain a reliable, efficient electric distribution system. There are more than 40 municipal utilities currently in the program using a variety of services to fit their needs. Put this service to work for your local utility!

Annual On-Site Services:

- Electric Distribution System Review
- Meter Verification Audit
- Infrared System Scan
- General Consulting/Member Support

Other Services:

- Meter-testing equipment
- Reliability Assessment
- System Loss Analysis
- Environmental Compliance Audit

Training & Instruction:

- National Electric Safety Code Manual
- American Public Power Association safety manuals
- On-site Operational Training
